

# Weekly Economic Commentary – Jan 10, 2022

## Markets

It was a rough start to the New Year for equity markets: investor concerns over the severity of the Omicron variant seems to have been replaced by a potential acceleration in interest rate hikes (post publication of the FOMC minutes) and rising inflationary pressures (Europe data). Most markets closed in the red including the MSCI all world and Stoxx indices (which had both touched record highs on Tuesday), while the FTSE 100 remained a bright spot supported by commodity-linked stocks. China's tech stocks were weak (in line with the global picture) but there were hopes of policy easing. In the region, most markets closed higher than a week ago, with Dubai posting its second consecutive weekly gain. The dollar posted a slight weekly gain, its first in 3 weeks. Oil prices increased from last week – supply concerns are coming to the forefront given the unrest in Kazakhstan even as the OPEC+ went ahead with its policy decision to gradually raise production next month. Gold price, though edging up from 3-week lows on Friday, ended 0.2% lower compared to a week ago.

Weekly % changes for last week (2 – 7 Jan) from 30 Dec (regional) and 31 Dec (international).

## Global Developments

### US/Americas:

from an upwardly revised Nov reading of **US non-farm payrolls fell to 199k in Dec** • **Unemployment rate slipped** consecutive month of job growth. <sup>th</sup>249k: this was the 12 in Dec (Nov: 4.2%) though the size of the civilian labour force remains lower by **to 3.9%**

---

more than 2 million compared to pre-pandemic levels. Labour force participation rate inched up to 61.9% (Nov: 61.8%) while average hourly earnings increased by 4.7% yoy and 0.6% mom.

- (Nov: 505k) - the most in 7 **Private sector in the US hired 807k workers in Dec** months - led by the leisure and hospitality sector (264k new jobs) and transportation and utilities (138k).
- in Nov, up by 8.9%mom and higher than the **A record 4.53mn workers quit their jobs** to 10.562mn in Nov; **JOLTS job openings declined** previous record in Sep (4.36mn). job openings rate was 6.6%, down from about 7% in Oct but well ahead of 4.5% from a year
- , from the **stInitial jobless claims increased to 207k in the week ended Dec 31** previous week's upwardly revised 200k, while the 4-week average stood higher at 204.5k. Continuing claims increased by 36k to 1.754mn in the week ended Dec 24.
- Fed's hawkish stance, stating they may need to raise **FOMC minutes showed the reduction in the size of the** rates "sooner or at a faster pace" and also called for a (which stands are just below USD 9trn, more than doubled since early **balance sheet** 2020) soon after the first rate hike.
- (Nov: 61.1), with new orders **ISM manufacturing PMI in the US eased to 58.7 in Dec** slipping to 60.4 (Nov: 61.5) while employment improved the most since Apr (54.2 from 53.3) and prices paid fell to 68.2 (the lowest reading since Nov 2020) from 82.4.
- (Nov: 69.1), with slowdowns across new orders **ISM services PMI slipped to 62 in Dec** (61.5 from Nov's 69.7), employment sub-index (54.9 from Nov's 56.5) and production (67.6 from Nov's 74.6) while prices paid inched up to 82.5 from 82.3 the month prior.
- (from the preliminary **Markit manufacturing PMI in the US edged down by 0.1 point** ; output expectations however strengthened to the highest since **to 57.7 in Dec** reading) Nov 2020. Services and composite PMI inched up by 0.1 points each to 57.6 and 57 respectively.
- (Oct: USD 67.2bn) as overall **Trade deficit in the US widened to USD 80.2bn in Nov** imports increased by 4.6% (to USD 304.4bn) and exports inched up by 0.2%. Goods **goods** trade deficit stood at USD 99bn in Nov from USD 97.8bn the month before, with (led by industrial supplies **imports rising by 5.1% to an all-time high of USD 254.9bn** and materials). Exports of goods fell by 1.8% to USD 155.9bn, dragged down by declines in capital goods.
- (Oct: 1.2%) with shipments **Factory orders in the US increased by 1.6% mom in Nov** of core capital goods up by 0.3%.

## :Europe

- , the **Germany's Markit manufacturing PMI remained unchanged at 57.4 in Dec** **Services** lowest since Jan 2021, though lower than the preliminary reading of 57.9. (as new export business fell **stayed below the 50-mark** improved to 48.7 but **PMI** steeply), as did composite PMI (49.9 in Dec from Nov's 50).
- (Nov: 58.4), the lowest level **Manufacturing PMI in the eurozone stood at 58 in Dec** since Feb: new orders rose the least since Jan while inventories posted the largest ever increase. Services PMI slipped to 53.1 in Dec (Nov:55.9) as new order growth slowed to an 8-month low and the employment sub-index slipped to a 7-month low; as a result the composite PMI eased slightly to 53.3.
- (Nov: **inched up to a record high of 5.0% in Dec** **Consumer price in the eurozone**

- 
- 4.9%), thanks to an increase in prices of energy (+26%) as well as food, drinks and tobacco (3.2%) among others. Core inflation meanwhile remained unchanged at 2.6% yoy in Dec.
- (Oct: 21.9%) – **Producer price index in the eurozone jumped by 23.7% yoy in Nov** the highest on record.
  - (Oct: 1.7%) **Retail sales in the eurozone surged by 7.8% yoy and 1% mom in Nov**, with sales rising by 1.6% for **biggest mom increase since June** yoy). This was the non-food products and 0.6% for food, drinks and tobacco while it fell for automotive fuels (-1.5%).
  - (but remains at a **harmonized index of consumer prices in Germany eased to** The (Nov: 6%), with energy prices up by 18.3% yoy and food **5.7% yoy in Dec** relatively high) **In 2021, German inflation averaged 3.1% - the highest since 1993** costs higher by 6%.
  - (Oct: EUR 12.4bn), as **Germany's trade surplus narrowed to USD 10.9bn in Nov** exports increased (+1.7% mom) at a slower pace than imports (+3.3%). Monthly exports were 5.7% higher than their level in Feb 2020 while imports were 17.5% higher.
  - (Oct: -5.8%), with new orders **German factory orders rebounded by 3.7% mom in Nov** from abroad surging by 8% and from the euro area rising by 13%. Compared to Feb 2020, orders were higher by 6.6%.
  - Industrial production in Germany unexpectedly declined by 2.4% yoy and 0.2% mom in Nov.** Manufacture of capital goods fell by 0.6% while the production of intermediate and consumer goods rose by 0.8% each. Furthermore, energy production and production in construction fell by 4% and 0.8% respectively.
  - (Oct: 0.5%), with **German retail sales unexpectedly inched up by 0.6% mom in Nov** sales rising at both supermarkets (+0.8%) and department stores (+2.6%). However, in yoy terms sales were down by 2.9%.
  - (Nov: 5.3%), with the **Unemployment rate in Germany edged down to 5.2% in Dec** number of unemployed decreasing by 23k to 2.405mn - the lowest total jobless level since Mar 2020.
  - (Nov: 58.1), after **Markit manufacturing PMI in the UK tipped down to 57.9 in Dec** straight month and inflationary pressure added to Brexit woes <sup>th</sup> new orders fell for a 4 , after the sector **Services PMI slipped to 53.6 from Nov's 58.5** and Covid restrictions. dragged down by staff absences (due to the variant) and fall in spending (given restrictions on face-to-face customer services).

## :Asia Pacific

- , with a **China's Caixin manufacturing PMI moved into expansionary territory** reading of 50.9 in Dec (Nov: 49.9) – the highest since June. New orders moved into consecutive month. <sup>th</sup>growth though export sales shrank, and employment fell for the 5 consecutive <sup>th</sup>(Nov: 52.1), rising for a 4 **Caixin services PMI increased to 53.1 in Dec** month.
- (Nov: 0.5%). Excluding just fresh **Inflation in Tokyo increased to 0.8% yoy in Dec** food, prices inched up to 0.5% (Nov: 0.3%). Excluding fresh food and energy, inflation stood at -0.3%.
- , bringing the 2021 growth to **Singapore GDP grew by 2.6% qoq and 5.9% yoy in Q4** 7.2%. Rebounding from 2020's 5.2% contraction, this was the fastest pace of growth since 2010.

---

largely due **Retail sales in Singapore increased by 2.5% mom and 1.9% yoy in Nov,** •  
to higher petrol prices (21.1% yoy) and demand for watches and jewellery (15.3%).  
Excluding motor sales, retail sales were up 4.1% yoy and 2.9% mom.

**Bottomline: Prior to the earnings season (when further profit hikes are expected, 22.3% according to Refinitiv IBES), the Omicron variant remains a threat. Record cases have been reached in US and Europe as global cases cross 300mn amid news of reinfection risk (individuals who have recovered from Covid are 3 to 5 times more likely to be reinfected) and China's pandemic controls over Tianjin (city with 14mn people, where the first community transmission in the country was reported). With vaccination rates rising across the globe (India starts booster shots from today for those aged 60 and above), complete lockdowns seem unlikely though curfews and restrictions on gatherings will impact economic activity slightly. More importantly, with China in new lockdowns supply chain disruption is on the cards – the question only remains how severe.**

### Regional Developments

in the draft budget, **Egypt's growth is estimated at 5.7% in the 2022-23 fiscal year** •  
slightly higher compared to 5.6% in the fiscal year that ends June 2022. The draft budget aims to lower deficit to 6.1% of GDP and reduce debt to less than 90% of GDP.
